PCR Primer: A Laboratory Manual
Edited by Carl W. Dieffenbach, National Institute of Allergy and Infectious Diseases, Gabriela S. Dveksler, Uniformed Services University of the Health Sciences

From its first-published account in 1985, the polymerase chain reaction has become a standard research tool in a wide range of laboratories. Its impact has been felt in basic molecular biological research, clinical research, forensics, evolutionary studies, and the Human Genome Project. The PCR technique originally conceived by Nobel laureate Kary Mullis has proven to be exceptionally adaptable and has been transformed into a myriad array of methods, each with different applications.

**CONTENTS**

**Introduction to PCR**
- Setting Up a PCR Laboratory (C.W. Dieffenbach et al.); A Standard PCR Protocol: Rapid Isolation of DNA and PCR Assay for β-Globin (M.T. Vahey et al.); Enzymatic Control of Carboxy-Methyl Transfer Reaction in PCR (J.L. Hartley, A. Rashtchian); Ultraviolet Irradiation of Surfaces to Reduce PCR Contamination (R.W. Cone, M.R. Fairfax); Specificity, Efficiency, and Fidelity of the PCR (R.S. Cha, W.G. Thilly); Optimization and Troubleshooting in PCR (K.H. Roux); Long-Distance PCR (O.S. Foord, E.A. Rose)

**Sample Preparation**
- Rapid Preparation of DNA for PCR Amplification with Gene Releaser (E.P. Dawson et al.); PCR Amplification from Paraffin-embedded Tissues: Sample Preparation and the Effects of Fixation (C.E. Greer et al.); RNA Purification (J.J. Adamovicz, W.C. Gause)

**Primer Design**
- General Concepts for PCR Primer Design (C.W. Dieffenbach et al.); Design and Use of Mismatched and Degenerate Primers (S. Kwok et al.); Multiplex PCR (M.C. Edwards, R.A. Gibbs)

**Detection of PCR Products: Quantitation and Analysis**
- Immunochemical Detection of PCR Products (J.G. Lazar); Quantitative PCR Using the AmpliSensor Assay (C.N. Wang); DNA Fingerprinting Using Arbitrarily Primed PCR (M. McClelland, J. Welsh); RNA Fingerprinting Using Arbitrarily Primed PCR (M. McClelland, J. Welsh); In Situ PCR (G.J. Nuovo); Single-strand Conformational Polymorphism (K. Fujita, J. Silver); Genetic Subtyping of Human Immunodeficiency Virus Using a Heteroduplex Mobility Assay (E.L. DeWart et al.); Sensitive and Fast Mutation Detection by Solid-phase Chemical Cleavage (L.L. Hansen et al.)

**PCR Starting from RNA**
- Use of the PCR to Quantitate Relative Differences in Gene Expression (W.C. Gause, J.J. Adamovicz); Quantitative Liquid Hybridization PCR Method Employing Storage Phosphor Technology (M.T. Vahey, M.T. Wong); Use of the SNuPE Assay to Quantitate Allele-specific Sequences Differing by a Single Nucleotide (J. Singer-Sam); Trapping Internal and 3'-Terminal Exons (P.E. Nisson et al.);

**PCR-mediated Cloning**
- Rapid Amplification of cDNA Ends (M.A. Frohman); Panhandle PCR (D.H. Jones); Detection and Identification of Expressed Genes by Differential Display (P. Warthoe et al.); Construction of Subtractive cDNA Library Using Magnetic Beads and PCR (A. Lonneborg et al.); PCR-based Method for Screening DNA Libraries (D.I. Israel); Screening of YAC Libraries with Robotic Support (M.M. Blanchard, V. Nowotny); Phagemid Display Libraries Derived from PCR-immortalized Rearranged Immunoglobulin Genes (H.H. Hogrefe, B. Shopes)

**PCR Sequencing**
- Direct Sequencing of PCR-amplified DNA (V.B. Rao); Cycle Sequencing (K. Kretz et al.)

**Cloning of PCR Products**
- Strategies for Cloning PCR Products (R. Levis); Cloning and Analysis of PCR-generated Fragments (G.L. Costa, M.P. Weiner)

**Mutagenesis by PCR**
- Mutagenic PCR (R.C. Cadwell, G.F. Joyce); PCR Mutagenesis and Recombination In Vivo (D.H. Jones); Mutagenesis and Synthesis of Novel Recombinant Genes Using PCR (A.N. Vallejo et al.); Rapid PCR Site-directed Mutagenesis (M.P. Weiner, G.L. Costa)

**Alternative Amplification Technologies**
- Ligase Chain Reaction (M. Weidmann et al.); Optimization and Characterization of T3R-Dependent Assays (R. T. Ginges et al.); One-tube Quantitative HIV-1 Reverse Transcriptase (B. van Gemen et al.)

**Appendices**
- Computer Software for Selecting Primers; Reagents and Equipment

1995, 714 pp., illus., appendices, index

Tired of waiting for the pass-along copy to reach you? Tired of discovering that the library copy is missing? Tired of missing out on all the important developments reported by *Genes & Development* twice a month? Now, you too can afford *Genes & Development* thanks to a new introductory rate! You too can gain immediate access to the latest breaking news in these areas:

- cell cycle function
- tumor suppressor genes and oncogenes
- gene expression
- DNA replication
- splicing
- disease models
- pattern formation and regulation during development
- chromosome structure and function
- signal transduction

**Cut along dotted line...**

**TIME TO GET YOUR OWN COPY?**

...and FAX this portion to 516-349-1946

**"YES!** Please sign me up. I would like to take advantage of the introductory price of $90 (U.S.) $185 (overseas, including airlift delivery) for a full year's subscription (24 issues) of *Genes & Development* beginning in January, 1996.

**Double Talking Helix Blues**

By Joel Herskowitz, New England Medical Center Hospitals, Boston; illustrated by Judy Cuddihy, Cold Spring Harbor Laboratory; additional text by Ira Herskowitz, University of California at San Francisco

Provides young readers with a wonderful introduction to concepts of cells and molecules, reproduction at the molecular level, and DNA and its structure. This is a book and audiotape presentation based on a song, "Double Talking Helix Blues." The 32-page book is lavishly illustrated to provide an important visual component to the overall "lesson" on DNA. (Ages 8 and up, as well as teachers, scientists, and all those interested in molecular biology at its most basic level.)

1993, 32 illustrated four-color pages
Cloth (includes 12-minute audiocassette)

---

**DNA Is Here to Stay**

By Fran Balkwill, ICRF, and Mic Rolph, London

This colorful book explores the secret of life itself — the secret of DNA. It is designed to teach young readers about the master plan that directs the growth of a single cell into a complete human being. (Ages 9-15)

1992, 32 fully illustrated 4-color pages

Price $8.95  ISBN 0-00-191165-1

*(Published in the U.K. by HarperCollins Publishers)*

---

**Cells Are Us**

By Fran Balkwill, ICRF, and Mic Rolph, London

This is a book about the various types of cells that make up the human body. By using lively and expressive language, and by portraying the different cells with colorful and imaginative drawings, the author and artist teach the reader how an individual person is created from just one cell. (Ages 5-8)

1990, 32 fully illustrated 4-color pages

Price $8.95  ISBN 0-00-196306-6

---

**Cell Wars**

By Fran Balkwill, ICRF, and Mic Rolph, London

After reading this fully illustrated account of immune responses and other anti-microbial reactions, a child will view illness quite differently. He/she will have a better understanding about what actually happens up one's nose, down one's throat, and anywhere else that has been invaded by germs. (Ages 7-13)

1990, 32 fully illustrated 4-color pages

Price $8.95  ISBN 0-00-196307-4

---

**Amazing Schemes Within Your Genes**

By Fran Balkwill, ICRF, and Mic Rolph, London

Although about 99.5% of your genes are the same as everybody else's, some parts vary: hair color, shape of ears, color of skin. And some people inherit genetic diseases like cystic fibrosis. How does that happen? Read this book to discover some amazing facts about your genes. (Ages 9-15)

1993, 32 fully illustrated 4-color pages

Price $8.95  ISBN 0-00-196465-8

---

**Microbes, Bugs and Wonder Drugs**

By Fran Balkwill, ICRF, and Mic Rolph, London with Victor Darley-Usmar, Wellcome Research Laboratories

This book is about drugs—their discovery, development, use and abuse, and their impact on everyday life. Highly illustrated in an entertaining, eclectic style, the book tells compelling stories for young people about the real science of antibiotics, vaccines, immunostimulants, and medicines for allergies and cancer (Ages 12 and up).

1995, 128 pp

Cloth $20  ISBN 1-85578-065-8

(All orders for this book outside of the U.S. and Canada should be forwarded to Portland Press, Commerce Way, Colchester CO2 8HP, United Kingdom. Tel: 44-1206-796351 Fax: 44-1205-799331)
