Function & Dysfunction in the Nervous System
Cold Spring Harbor Symposia on Quantitative Biology, Volume LXI

Much is being learned about how the brain works by studies of diseases that affect it. This ambitious volume portrays some of the most exciting aspects of neuroscience today - language development, visual awareness, neuronal plasticity, sensory perception, memory formation - by presenting studies on their normal mechanisms alongside illuminating investigations of abnormalities caused by degenerative disease, addiction, developmental errors, and other maladies. In this sixty-first volume of the most prestigious book series in experimental biology, over eighty of the world's most distinguished investigators provide a perspective that resonates beyond the lab bench into the clinics of the not-so-distant future.

CONTENTS (and principal authors)
Language and Visual Processing
M.M. Merzenich, M.E. Raichle, R.A. Andersen, D.H. Hubel, J.A. Movshon, C. Koch

Handedness
A.J.S. Klar

Perceptual Plasticity

Sensory Perception
R. Axel, L.B. Buck, C.I. Bargmann, R.R. Reed, R.E. Margolskee

Memory

Rhythms
M. Rosbash, M.W. Young, P. Sassone-Corsi, J.S. Takahashi

Channels and Receptors
A. Hudspeth, D.P. Corey, J.L. Noebels, J.O. McNamara, P.R. Schofield, J.-P. Changeux, Z.W. Hall, M.V.L. Bennett

Neuronal Survival and Signaling

Prions

Alzheimer's Disease
A. Goate, P.H. St. George-Hyslop, M. Goedert, C.L. Masters, D.J. Selkoe, A.D. Roses

Neurodegenerative Diseases

Dementia, Addiction, and Psychiatric Diseases

1997, 875 pp., illus., color plates, appendices

How to Order!
Call Toll-Free: 1-800-843-4388 (Continental U.S. and Canada)
or Call: 516-349-1930 (All other locations)
FAX: 516-349-1946
E-mail: cshpress@cshl.org
WWW Site: http://www.cshl.org/
Write: CSHL Press, 10 Skyline Drive, Plainview, NY 11803-2500
Please give this order form to your librarian to ensure that your library has a subscription to *G&D*. 

**GENES & DEVELOPMENT**

Vol. 11, 1997

ISSN 0890-9369

- Individual price (U.S.) - $120
- Individual price (R.O.W. Airlift Delivery) - $215
- Student price (U.S.) - $90*
- Student price (R.O.W. Airlift Delivery) - $185*
- Institutional price (U.S.) - $587.00
- Institutional price (R.O.W. Airlift Delivery) - $682.00

*Those who qualify must provide student I.D.

Personal orders must be prepaid by personal check, credit card or money order.

Check or money order enclosed (U.S. Bank Checks Only)

Charge to: □ MASTERCARD □ VISA □ DISCOVER

Institutional price (U.S.) - $587.00
Institutional price (R.O.W. Airlift Delivery) - $682.00

Erratum

\textbf{Cover} Jun is expressed in the epidermis of a \textit{Drosophila} embryo during dorsal closure. A whole-mount preparation of a \textit{Drosophila} embryo in the final stages of dorsal closure was stained for Jun expression (red nuclear fluorescence) and for corracle protein (green fluorescence outlining the elongated epidermal cells). The last dorsal opening is about to close. Images were taken on the EMBL confocal microscope. (For details, see Kockel et al., p. 1748. For related papers, see Riesgo-Escovar and Hafen, p. 1717; Hou et al., p. 1728; and Glise and Noselli, p. 1738.)
