**Fly Pushing**
The Theory and Practice of Drosophila Genetics

By Ralph J. Greenspan, New York University
Entertaining and lucid, Greenspan guides the reader carefully through the practicalities of making crosses, isolating variants, mapping genes, constructing specific genotypes, and analyzing mutations. No previous knowledge of fly genetics is assumed. The techniques used are illustrated, and practice problems and solutions are included to assist the reader.

1997, 155 pp., illus., appendices
Cloth $35 ISBN 0-87969-492-0

**Oxidative Stress and the Molecular Biology of Antioxidant Defenses**

Monograph 34
Edited by John G. Scandalios, North Carolina State University
Written and edited by leaders in this growing field, this volume is an essential work of reference for specialists and investigators with wider interests in cell biology, aging and cancer biology.

1997, 904 pp., illus., color plates, index
Cloth $150 ISBN 0-87969-502-1

**Genetic Instability in Cancer**

Cancer Surveys, Volume 28
Edited by Thomas Lindahl, Imperial Cancer Research Fund
This series, edited by J. Tooze (as of Volume 26), provides a comprehensive survey of the present state and future developments in well-defined areas in oncology. Each issue deals with a specific topic and has guest editors with an expert knowledge of the subject.

1996, 353 pp., illus., color plates
Cloth $90 ISBN 0-87969-485-8

**Correcting the Blueprint of Life**
An Historical Account of the Discovery of DNA Repair Mechanisms

By Errol C. Friedberg, The University of Texas Southwestern Medical Center, Dallas
In this brief, readable, and revealing book, one of the pioneers of the now rapidly evolving field of DNA repair traces the history of the discovery of the more important mechanisms by which cells respond to DNA damage. Errol Friedberg has written an enjoyable and informative introduction to the study of DNA mutagenesis and repair that will interest students at an advanced undergraduate or graduate student level as well as investigators in fields as diverse as oncogenesis, cell cycle regulation, transcription and DNA replication.

Due May 1997, 230 pp. (approx.), illus., index

**Epigenetic Mechanisms of Gene Regulation**

Monograph 32
Edited by Vincenzo E.A. Russo, Max-Plank-Institut für Molekulare Genetik; Robert A. Martienssen, Cold Spring Harbor Laboratory; Arthur D. Riggs, Beckman Research Institute of the City of Hope
This monograph, edited by three well-known biologists from different specialties, is the first to review and synthesise what is known about these effects across all species, particularly from a molecular perspective, and will be of interest to everyone in the fields of molecular biology and genetics.

1996, 692 pp., illus., color plates, glossary, index
Cloth $125 ISBN 0-87969-490-4

**C. elegans II**

Monograph 33
Edited by Donald L. Riddle, University of Missouri, Columbia; Thomas Blumenthal, Indiana University; Barbara J. Meyer, University of California, Berkeley; and James R. Priess, Howard Hughes Medical Institute, Fred Hutchinson Cancer Research Center, Seattle
This volume is a must for any investigator doing worm studies but it has been written and rigorously edited for a wider community of investigators in cell and molecular biology who should know how new knowledge of C. elegans relates to their own specialty.

1997, 1222 pp., illus., color plates, index

Subscription Price
Orders may be sent to Cold Spring Harbor Laboratory Press, Fulfillment Department, 10 Skyline Drive, Plainview, NY 11803-9729. Telephone: Continental US except NY State, 1-800-843-4388; all other locations, 516-349-1930/1931/1932. FAX 516-349-1946. Volume 11, 1997, $587.00, U.S. institutional, $682.00, R.O.W. institutional. Personal subscription rate: $120, U.S.; $215, R.O.W. Price includes surface-postage for U.S. and airmail for R.O.W. Genetical Society members, $167.00. All subscriptions are entered for the calendar year and must be prepaid. Personal subscriptions must be prepaid by personal check, credit card, or money order. All checks must be for US dollars and drawn on a US bank. Genetical Society members may also subscribe by check, payable to the Genetical Society, for $167 (includes airmail). Send to: Dr. Veronica van Heyningen, MRC Human Genetics Unit, Western General Hospital, Crewe Road, Edinburgh EH4 2XU, UK.

Research papers
Tpl-2 is an oncogenic kinase that is activated by carboxy-terminal truncation 688
Jeffrey D. Ceci, Christos P. Patriotis, Christos Tsatsanis, Antonios M. Makris, Robert Kovatch, Deborah A. Swing, Nancy A. Jenkins, Philip N. Tsichlis, and Neal G. Copeland

The PI 3-kinase/Akt signaling pathway delivers an anti-apoptotic signal 701
Scott G. Kennedy, Andrew J. Wagner, Suzanne D. Conzen, Joaquin Jordán, Alfonso Bellacosa, Philip N. Tsichlis, and Nissim Hay

Targeted expression of MDM2 uncouples S phase from mitosis and inhibits mammary gland development independent of p53 714
Karen Lundgren, Roberto Montes de Oca Luna, Yvette Boddie McNeill, Elena P. Emerick, Ben Spencer, Cynthia Rahn Barfield, Guillermina Lozano, Michael P. Rosenberg, and Cathy A. Finlay

A single-point mutation in HCF causes temperature-sensitive cell-cycle arrest and disrupts VP16 function 726
Hiroshige Goto, Seiichi Motomura, Angus C. Wilson, Richard N. Freiman, Yusaku Nakabeppu, Kohtaro Fukushima, Masatoshi Fujishima, Winship Herr, and Takeharu Nishimoto

Analysis of a cAMP-responsive activator reveals a two-component mechanism for transcriptional induction via signal-dependent factors 738
Toshihiro Nakajima, Chiharu Uchida, Stephen F. Anderson, Jeffrey D. Parvin, and Marc Montminy

A novel Rap1p-interacting factor, Rif2p, cooperates with Rif1p to regulate telomere length in *Saccharomyces cerevisiae* 748
David Wotton and David Shore

Involvement of the carboxyl terminus of vertebrate poly(A) polymerase in U1A autoregulation and in the coupling of splicing and polyadenylation 761
Samuel I. Gunderson, Stéphan Vagner, Maria Polycarpou-Schwarz, and Iain W. Mattaj

Multilineage gene expression precedes commitment in the hemopoietic system 774
Ming Hu, Diane Krause, Mel Greaves, Saul Sharkis, Michael Dexter, Clare Heyworth, and Tariq Enver

(continued)
The bZIP transcription factor LCR-F1 is essential for mesoderm formation in mouse development
Susan C. Farmer, Chiao-Wang Sun, Glenn E. Winnier, Brigid L.M. Hogan, and Tim M. Townes

The ROOT HAIR DEFECTIVE3 gene encodes an evolutionarily conserved protein with GTP-binding motifs and is required for regulated cell enlargement in Arabidopsis
Haiyang Wang, Susan K. Lockwood, Mark F. Hoeltzel, and John W. Schiefelbein
