Letter to the editor

The POU domain: a large conserved region in the mammalian pit-1, oct-1, oct-2, and Caenorhabditis elegans unc-86 gene products

Research papers

cAMP acts in synergy with E1A protein to activate transcription of the adenovirus early genes E4 and E1A
Daniel A. Engel, Stephen Hardy, and Thomas Shenk

Induction of proto-oncogene fos transcription through the adenylate cyclase pathway: characterization of a cAMP-responsive pathway
Paolo Sassone-Corsi, Jane Visvader, Louis Ferland, Pamela L. Mellon, and Inder M. Verma

Isolation and characterization of Drosophila cAMP-dependent protein kinase genes
Daniel Kalderon and Gerald M. Rubin

Cloning and expression of AP-2, a cell-type-specific transcription factor that activates inducible enhancer elements
Trevor Williams, Arie Admon, Bernhard Lüscher, and Robert Tjian

The B-cell-specific Oct-2 protein contains POU box- and homeo box-type domains
Roger G. Clerc, Lynn M. Corcoran, Jonathan H. LeBowitz, David Baltimore, and Phillip A. Sharp

The ubiquitous octamer-binding protein Oct-1 contains a POU domain with a homeo box subdomain
Richard A. Sturm, Gokul Das, and Winship Herr

Control elements of the P2 promoter of the Antennapedia gene
Anne M. Boulet and Matthew P. Scott

In vitro analysis of the Antennapedia P2 promoter: identification of a new Drosophila transcription factor
Karen K. Perkins, Gina M. Dailey, and Robert Tjian

Alternative splicing of tropomyosin pre-mRNAs in vitro and in vivo
David M. Helfman, William M. Ricci, and Linda A. Finn

Isolation and characterization of a novel trophoblast-specific cDNA in the mouse
Kathryn R. Lescisin, Susannah Varmuza, and Janet Rossant

A mouse gene homologous to the Drosophila gene caudal is expressed in epithelial cells from the embryonic intestine
Philippe Duprey, Kamal Chowdhury, Gregory R. Dressler, Rudi Balling, Dominique Simon, Jean-Louis Guenet, and Peter Gruss

(over)
Molecular analysis of the swallow gene of Drosophila melanogaster
Edwin C. Stephenson, Yu-Chan Chao, and James D. Fackenthal

Molecular characterization of daughterless, a Drosophila sex determination gene with multiple roles in development
Claire Cronmiller, Paul Schedl, and Thomas Cline

A link between cell movement and gene expression argues that motility is required for cell–cell signaling during fruiting body development
Lee Kroos, Patricia Hartzell, Karen Stephens, and Dale Kaiser

Cover In situ hybridization of Cadl to mouse embryos. Dark-field image of sagittal section through the gut of a 17-day p.c. embryo showing multiple transverse and longitudinal sections through the small intestine. [For details, see Duprey et al., p. 1647.]
