The Eppendorf Microcentrifuge.

With 18-tube capacity, variable speed, quiet operation, and quick-release rotor.

Better all-around performance.

Higher capacity...plus.
The 18-tube Model 5415 Micro Centrifuge gives you important operating advantages—
with unique Eppendorf quality.

Versatile in use.
Model 5415 has a variable-speed motor that reaches a maximum of 14,000 rpm with an RCF of 16,000 x g; a 30-minute timer; and a momentary button for short spins. It accepts 1.5 mL, 500 µL, 400 µL, and 250 µL Eppendorf microcentrifuge tubes and blood collection microtubes, such as B-D Microtainer® Tubes.*

Superior rotor design.
The enclosed rotor design reduces air turbulence and noise. Tubes are angled precisely at 45° to maximize pellet formation.

Enclosed rotor design reduces air turbulence and noise. Tubes are angled precisely at 45° to maximize pellet formation.

Safe and rugged.
The Eppendorf 5415 Micro Centrifuge is UL listed for safety. It's so rugged that an accidentally unbalanced load won't cause excessive vibration or motor damage.
