THE BENCHMARK IN ANTIBODIES

Since the day it was founded, Proteintech has been making all of its products to the highest standards possible while taking complete responsibility for the quality of each product.

- Proteintech makes every single antibody in its 12,000-strong catalog.
- Each Proteintech product is unique and cannot be bought under a different label.
- Antibodies detected in a siRNA knockdown experiment to demonstrate specificity.
- It works in any species and any application or get a full money-back refund.

Cellecta, Inc. provides custom and contract solutions for high-throughput functional genomics needs. Want to compare and contrast RNAi and CRISPR screens or need a fast knockdown or complete knockout? Looking for a custom knockout cell line? We have a solution for you.

- CRISPR & RNAi Screening Services
  - Dropout viability screening
  - Rescue screens
  - *In vivo* dropout screens

- Genome-Wide/Custom Pooled Libraries

- Custom Isogenic Cell Lines

- Custom Constructs

- Ancillary Products
  - CellTracker™ Lentiviral Barcode Library
  - CRISPRtest™ Functional Cas9 Activity Kit

Pioneers in Labeling & Detection – From Genome to Whole Cell
Darn Good!—Great Reactions Start with Really Good Antibodies

That's because every antibody is manufactured and validated on-site using a unique process that verifies target specificity with paired antibodies raised against distinct protein epitopes. We've heard our customers’ great reactions for over 40 years and now we'd like to hear what you’ll say.

2016

SCIENTIFIC CONFERENCES

Presenting the most significant research on cancer etiology, prevention, diagnosis, and treatment

Pancreatic Cancer: Advances in Science and Clinical Care
Conference Co-Chairpersons: Manuel Hidalgo, Christine Iacobuzio-Donahue, and Robert H. Vanderheide
May 12-15, 2016
Orlando, FL

AACR Precision Medicine Series: Targeting the Vulnerabilities of Cancer
Conference Co-Chairpersons: Stephen W. Fresik, Jeffrey E. Settleman, and Paul Workman
May 16-19, 2016
Miami, FL

Engineering and Physical Sciences in Oncology
Conference Co-Chairpersons: Rakesh Jain, Robert Langer, and Joan Brugge
June 25-28, 2016
Boston, MA

Fifth JCA-AACR Special Joint Conference on the Latest Advances in Hematological Cancer Research: From Basic Science to Therapeutics
July 13-15, 2016
Urayasu, Japan

EORTC-NCI-EMA-AACR International Conference on Innovation and Biomarkers in Cancer Drug Development
Conference Co-Chairpersons: Denis A. Lacombe and John W. Martens
September 8-9, 2016
Brussels, Belgium

Colorectal Cancer: From Initiation to Outcomes
Conference Co-Chairpersons: Ernest T. Hawk, Steven H. Itzkowitz, Kenneth W. Kinzler, and Johanna W. Lampe
September 17-20, 2016
Tampa, FL

Ninth AACR Conference on The Science of Cancer Health Disparities in Racial/Ethnic Minorities and the Medically Underserved
Conference Co-Chairpersons: Rick A. Kittles, Folakemi T. Odedina, Jeffrey N. Weissel, and Jun J. Yang
September 25-28, 2016
Fort Lauderdale, FL

Tumor Immunology and Immunotherapy
Conference Co-Chairpersons: James P. Allison, Pamela S. Ohashi, Antoni Ribas, and Ton Schumacher
October 20-23, 2016
Boston, MA

Translational Control of Cancer: A New Frontier in Cancer Biology and Therapy
Conference Co-Chairpersons: Jennifer A. Doudna, Frank McCormick, Davide Ruggero, and Nahum Sonenberg
October 27-30, 2016
San Francisco, CA

DNA Repair: Tumor Development and Therapeutic Response
Conference Co-Chairpersons: Robert G. Bristow, Maria Jasim, and Theodore S. Lawrence
November 2-5, 2016
Montreal, Quebec, Canada

New Horizons in Cancer Research: Delivering Cures Through Cancer Science
Conference Co-Chairpersons: José Basela, and Scott A. Armstrong
November 2-5, 2016
Shanghai, P.R. China

EORTC-NCI-AACR Molecular Targets and Cancer Therapeutics Symposium
November 29-December 2, 2016
Munich, Germany

San Antonio Breast Cancer Symposium
Conference Co-Directors: Carlos L. Arteaga, Virginia G. Kaklamani, and C. Kent Osborne
December 6-10, 2016
San Antonio, TX

FINDING CURES TOGETHER™
Binuclease® 50ku $58.00

Binuclease® (For the Digestion of DNA and RNA)

Binuclease is a genetically engineered endonuclease from Serratia marcescens. The enzyme is produced and purified from eukaryotic yeast cells, without contamination of endotoxin from prokaryotic cells. Functionally, this promiscuous nuclease digests all forms of DNA and RNA, including single stranded, double stranded, linear, circular and supercoiled DNA and RNA. The enzyme cleaves the phosphodiester bond of nucleic acids, producing 5’ monophosphate terminated oligonucleotides 2-5 bases in length. The Binuclease is not a sequence dependent nuclease, capable of cleaving the phosphodiester bond at all positions among a nucleic acid chain. This promiscuous endonuclease is applied for removing nucleic acids in biological products. In the industry of vaccine, protein and saccharides pharmaceuticals, this endonuclease is widely used to get rid of nucleic acids, reducing the nucleic acid contaminant in the vaccines and protein products. This promiscuous nuclease is the ideal choice for viscosity reduction of cell lysate and cell culture clarification.

Mutant Proteinase K 100mg $17.00

Mutant Proteinase K

The application of this Mutant Proteinase K is similar with wild type Proteinase K. But this mutant one has higher specific activity and more stable at room temperature. It is a non-specific serine proteinase with broad substrates. It is active over the pH range from 4 to 12. It can be used at any situation to digest native and denatured proteins. For instance, it is used for isolating mRNA or genomic DNA from different tissues and modifying glycoprotein for structure studies. Mutant Proteinase K is active with SDS, urea and EDTA and active between 15°C and 75°C.

Join Keystone Symposia for Upcoming Genetics & Development Conferences

Epigenetic & Metabolic Regulation of Aging & Aging-Related Diseases
Scientific Organizers: Anne Brunet, David M. Sabatini & Shelley L. Berger
May 1–5, 2016 | Santa Fe, New Mexico | USA
www.keystonesymposia.org/16E1

Understanding the Function of Human Genome Variation
Scientific Organizers: Kerstin Lindblad-Toh & Xavier Estivill
May 31–June 4, 2016 | Uppsala | Sweden
www.keystonesymposia.org/16K1

Precision Genome Engineering
Scientific Organizers: J. Keith Joung, Emmanuelle Charpentier & Olivier Danos
January 8–12, 2017 | Breckenridge, Colorado | USA
www.keystonesymposia.org/17A2

Transcriptional & Epigenetic Control in Stem Cells
Scientific Organizers: Konrad Hockel, Kathrin Plath & Marius Wernig
joint with Neurogenesis during Development & in the Adult Brain
Scientific Organizers: Alysson R. Muotri, Kinichi Nakashima & Xinyu Zhao
January 8–12, 2017 | Olympic Valley, California | USA
www.keystonesymposia.org/17J1 | www.keystonesymposia.org/17J2

Epigenetics & Human Disease: Progress from Mechanisms to Therapeutics
Scientific Organizers: Johnathan R. Whetstone, Jessica K. Tyler & Rabinder K. Prinjha
January 29–February 2, 2017 | Seattle, Washington | USA
www.keystonesymposia.org/17A9

Rare & Undiagnosed Diseases: Discovery & Models of Precision Therapy
Scientific Organizers: William A. Gahl & Christoph Klein
March 5–8, 2017 | Boston, Massachusetts | USA
www.keystonesymposia.org/17C2

Genomic Instability & DNA Repair
Scientific Organizers: Julia Promisel Cooper, Marco F. Foiani & Geneviève Almouzni
joint with DNA Replication & Recombination
Scientific Organizers: John F.X. Diffley, Anja Groth & Scott Keeney
April 2–6, 2017 | Santa Fe, New Mexico | USA
www.keystonesymposia.org/16Z1 | www.keystonesymposia.org/16Z2

Submit an abstract to participate fully in the conference via a poster presentation and possible selection for a short talk. Scholarships are available for graduate students and postdoctoral fellows. For full program, speaker, abstract and scholarship details, visit www.keystonesymposia.org/genetics
With more than 10 years’ experience handling RNA, our team of seasoned RNA scientists know how to ensure top quality RNA sequencing data with high mapping percentages – even from biofluid samples.

Everything we do is designed to advance your project and get the best results from your RNA samples – from high quality RNA isolation to comprehensive data analysis.

You can trust us with your valuable RNA samples.

RNA is simply what we do.
