Eppendorf® spins out two new winners.

Two new Micro Centrifuges that make your work faster, easier, and safer.

One has refrigeration. The new Model 5402 Refrigerated Micro Centrifuge spins heat-sensitive samples at temperatures as low as -9°C,* bringing the cold room to your benchtop.

Both control aerosols. The refrigerated model and the new Model 5415C Micro Centrifuge both use new, easily interchangeable rotors with lids for added quiet, convenience, and safety.

Call 800-645-3050; in New York, 516-334-7500, for more information. Or write Brinkmann Instruments, Inc., Cantiague Road, Westbury, NY 11590. (In Canada: 416-675-7911; 50 Galaxy Blvd., Rexdale, Ont. M9W 4Y5)

*At 12,500 rpm.

Research papers

Expression of the trk proto-oncogene is restricted to the sensory cranial and spinal ganglia of neural crest origin in mouse development
Dionisio Martin-Zanca, Mariano Barbacid, and Luis F. Parada

Pituitary cell phenotypes involve cell-specific Pit-1 mRNA translation and synergistic interactions with other classes of transcription factors
Donna M. Simmons, Jeffrey W. Voss, Holly A. Ingraham, Jeffrey M. Holloway, Ronald S. Broide, Michael G. Rosenfeld, and Larry W. Swanson

The homeo domain protein rough is expressed in a subset of cells in the developing Drosophila eye where it can specify photoreceptor cell subtype
Bruce E. Kimmel, Ulrike Heberlein, and Gerald M. Rubin

Reprogramming cell fate in the developing Drosophila retina: transformation of R7 cells by ectopic expression of rough
Konrad Basler, Deborah Yen, Andrew Tomlinson, and Ernst Hafen

Two genes differentially regulated in the cell cycle and by DNA-damaging agents encode alternative regulatory subunits of ribonucleotide reductase
Stephen J. Elledge and Ronald W. Davis

A yeast H2A–H2B promoter can be regulated by changes in histone gene copy number
Lorraine Moran, David Norris, and Mary Ann Osley

Sequences 5' to the polyadenylation signal mediate differential poly(A) site use in hepatitis B viruses
Roland Russnak and Don Ganem

Mechanism of 3' splice site selection by the catalytic core of the sunY intron of bacteriophage T4: the role of a novel base-pairing interaction in group I introns
François Michel, Pierre Netter, Ming-Qun Xu, and David A. Shub

Alternative splicing of the sex determination gene transformer-2 is sex-specific in the germ line but not in the soma
William Mattox, Melanie J. Palmer, and Bruce S. Baker

Subcellular localization of transcripts in Drosophila photoreceptor neurons: chaoptic mutants have an aberrant distribution
John A. Pollock, Mark H. Ellisman, and Seymour Benzer

The Drosophila Fos-related AP-1 protein is a developmentally regulated transcription factor
Karen K. Perkins, Arie Admon, Nipam Patel, and Robert Tjian

Activation of an intron enhancer within the keratin 18 gene by expression of c-fos and c-jun in undifferentiated F9 embryonal carcinoma cells
Robert G. Oshima, Leslie Abrams, and David Kulesh
A novel B-cell lineage-specific transcription factor present at early but not late stages of differentiation
Alcide Barberis, Katharina Widenhorn, Luigi Vitelli, and Meinrad Busslinger

A *Bacillus subtilis* regulatory gene product for genetic competence and sporulation resembles sensor protein members of the bacterial two-component signal-transduction systems
Yvette Weinrauch, Ruska Penchev, Eugenie Dubnau, Issar Smith, and David Dubnau

*Escherichia coli* RNase E has a role in the decay of bacteriophage T4 mRNA
Elisabeth A. Mudd, Agamemnon J. Carpousis, and Henry M. Krisch
