Contents

Review

Inhibitors of mammalian G₁ cyclin-dependent kinases 1149
Charles J. Sherr and James M. Roberts

Research papers

Identification of a developmental timer regulating the stability of embryonic cyclin A and a new somatic A-type cyclin at gastrulation 1164
John A. Howe, Mike Howell, Tim Hunt, and John W. Newport

Regulation of genomic imprinting by gametic and embryonic processes 1177
J. Richard Chaillet, Debra S. Bader, and Philip Leder

Relief of YY1 transcriptional repression by adenovirus E1A is mediated by E1A-associated protein p300 1188
Jeng-Shin Lee, Katherine M. Galvin, Raymond H. See, Richard Eckner, David Livingston, Elizabeth Moran, and Yang Shi

Trophinin and tastin, a novel cell adhesion molecule complex with potential involvement in embryo implantation 1199
Michiko N. Fukuda, Takaaki Sato, Jun Nakayama, George Klier, Mikio Mikami, Daisuke Aoki, and Shiro Nozawa

Gene trap capture of a novel mouse gene, jumonji, required for neural tube formation 1211
Takashi Takeuchi, Yukiko Yamazaki, Yuko Katoh-Fukui, Reiko Tsuchiya, Shunzo Kondo, Jun Motoyama, and Toru Higashinakagawa

On the functional overlap between two Drosophila POU homeo domain genes and the cell fate specification of a CNS precursor 1223
Su Ling Yeo, Alan Lloyd, Kevin Kozak, Ai Dinh, Thomas Dick, Xiaohang Yang, Shigeru Sakonju, and William Chia

The paired-like homeo box gene MHox is required for early events of skeletogenesis in multiple lineages 1237
James F. Martin, Allan Bradley, and Eric N. Olson

GATA-1 reprograms avian myelomonocytic cell lines into eosinophils, thromboblasts, and erythroblasts 1250
Holger Kulessa, Jonathan Frampton, and Thomas Graf

Position effect variegation in Drosophila is associated with an altered chromatin structure 1263
Lori L. Wallrath and Sarah C.R. Elgin

P-element repressor autoregulation involves germ-line transcriptional repression and reduction of third intron splicing 1278
Siobhan E. Roche, Michael Schiff, and Donald C. Rio

Cover  Clustering of trophonin, a novel cell adhesion molecule, in human endometrial adenocarcinoma SNG-M cells. (Inset) Tangential view of SNG-M cells stained with anti-trophonin antibodies, taken by a confocal laser scanning microscope (courtesy of Matthew Schibler, La Jolla Cancer Research Foundation). (For details, see Fukuda et al., p. 1199.)
