Contents

Research papers

An enhancer deletion affects both H19 and Igf2 expression
Philip A. Leighton, Jennifer R. Saam, Robert S. Ingram, Colin L. Stewart, and Shirley M. Tilghman

Activation of the HIV-1 enhancer by the LEF-1 HMG protein on nucleosome-assembled DNA in vitro

Bone morphogenetic protein-4 is required for mesoderm formation and patterning in the mouse
Glenn Winnier, Manfred Blessing, Patricia A. Labosky, and Brigid L.M. Hogan

Pyp1 and Pyp2 PTPases dephosphorylate an osmosensing MAP kinase controlling cell size at division in fission yeast
Jonathan B.A. Millar, Vicky Buck, and Marc G. Wilkinson

A pathway for lateral root formation in Arabidopsis thaliana
John L. Celenza Jr., Paula L. Grisafi, and Gerald R. Fink

The WT1 gene product stabilizes p53 and inhibits p53-mediated apoptosis
Shyamala Maheswaran, Christoph Englert, Patrick Bennett, Guenther Heinrich, and Daniel A. Haber

Temporally distinct patterns of p53-dependent and p53-independent apoptosis during mouse lens development
Huichin Pan and Anne E. Griep

Induction of apoptosis in HeLa cells by trans-activation-deficient p53
Ygal Haupt, Sheldon Rowan, Eitan Shaulian, Karen Vousden, and Moshe Oren

Essential role for p53-mediated transcription in E1A-induced apoptosis
Peter Sabbatini, Jiayuh Lin, Arnold J. Levine, and Eileen White

RAG-1 mutations that affect the target specificity of V(D)J recombination: a possible direct role of RAG-1 in site recognition
Moshe J. Sadofsky, Joanne E. Hesse, Dik C. van Gent, and Martin Gellert

Product news

Cover In situ hybridization analysis of H19 expression in the gut. [For details, see Leighton et al., p. 2079.]
