Cell Receptor Loci: The Importance of Comparative Large-scale DNA Sequence Analyses (L. Hood et al.); Criterion for the Completeness of Large-scale Physical Maps of DNA (M.V. Olson, P. Green); Mapping and Sequencing the Nuclear Genome of the Yeast Saccharomyces cerevisiae: Strategies and Results of the European Enterprise (B. Dujon); The Genome of the Nematode Caenorhabditis elegans (R. Waterston et al.); Integrated Mapping across the Whole Human Genome (I. Chumakov et al.)

**Repllication of the Genome**

The Replicon: Thirty Years Later (F. Jacob); Transcription Stimulates the Establishment of Bidirectional λ DNA Replication In Vitro (B. Learn et al.); Site-specific DNA-binding Proteins Important for Replication and Transcription Have Multipurpose Activities (B. Leder); Analysis of Replication Origin Function on Chromosome III of Saccharomyces cerevisiae (C.S. Newlon et al.); The Topography of Chromosome Replication in Yeast (B.J. Brewer et al.); The Replicon Model and Eukaryotic Chromosomes (S.P. Bell et al.); A Transcriptional Silencer as a Specialized Origin of Replication That Establishes Functional Domains of Chromatin (C.A. Fox et al.); The Mechanism of Fission Yeast Mating-type Interconversion: Evidence for Two Types of Epigenetically Inherited Chromosomal Imprinted Events (A.J.S. Klar, M.J. Bonaduce); Initiation of Replication at a Mammalian Chromosomal Origin (J.I. Hamlin et al.); Site-specific Initiation of DNA Replication in Metazoan Chromosomes and the Role of Nuclear Organization (D.M. Gilbert et al.); DNA Amplification in DNA Puff II/9A of Sciara coprophila (S.A. Gerbi et al.); Two DNA Polymerases: HIV Reverse Transcriptase and the Klenow Fragment of Escherichia coli DNA Polymerase I (T.A. Steitz et al.)

**Recombination, Repair, and Genome Stability**

**Centromeres and Telomeres**

Molecular Analysis of the Budding Yeast Centromere/Kinetochore (W. Jiang, J. Carbon); Structure and Function of Chromosomes in Mitosis of Budding Yeast (V. Guacci et al.); Structure and Function of Schizosaccharomyces pombe Centromeres (L. Clarke et al.); The INCENPs: Structural and Functional Analysis of a Family of Chromosome Passenger Proteins (A.M. Mackay, W.C. Earnshaw); In Vivo and In Vitro Studies of Telomeres and Telomerase (M.S. Lee et al.); Telomerase and Telomere-length Regulation: Lessons from Small Eukaryotes to Mammals (C. Greider); Structural and Temporal Analysis of Telomere Replication in Yeast (R.J. Welling et al.); The Positioning of Yeast Telomeres Depends on Sir3, Sir4, and the Integrity of the Nuclear Membrane (F. Palladino et al.)

**Nuclear Structure**

Snurposomes and Coiled Bodies (Z. Wu et al.); From the Chromosomal Loops and the Scaffold to the Classic Bands of Metaphase Chromosomes (Y. Saitoh, U.K. Laemmli); Studies of Metaphase and Interphase Chromosomes Using Fluorescence In Situ Hybridization (B.J. Trask et al.); Role of Chromosome Territories in the Functional Compartmentalization of the Cell Nucleus (T. Cremer et al.); Mechanisms of Intracellular Transcript Localization and Export in Early Drosophila Embryos (I. Davis et al.); Dynamics of Transcript and Pre-mRNA Splicing within the Mammalian Cell Nucleus (D.L. Spector et al.); Probing Functional Organization within the Nucleus: Is Genome Structure Integrated with RNA Metabolism? (J.B. Lawrence et al.)

**Summary:** Genetic Tinkering—Local Problems, Local Solutions (H. Weintraub)

NEW! COMPACT!
24-place EPPENDORF® MICRO CENTRIFUGE.

The newest Eppendorf Micro Centrifuge rounds out the family with greater capacity, versatility, and ease of use.

Now Eppendorf offers the widest selection of compact micro centrifuges—all designed and manufactured under an approved ISO 9001 quality system.

NEW Full-featured Model 5417 offers a choice of three interchangeable, autoclavable rotors with lid:
- 24-place fixed-angle rotor
- 24-place aerosol-tight fixed-angle rotor for protection from hazardous aerosols
- 12-place swing-bucket rotor for forming flat pellets

The programmable brushless motor spins up to 14,000 rpm and over 20,800 x g.

Other Eppendorf models valued for economy, reliability, and important features.

New economical Model 5410 provides outstanding value. Popular Model 5415C is the proven workhorse. And, CFC-free refrigerated Model 5402 cools to -9°C, bringing the cold room to your benchtop.

For more information, call 800-645-3050; in Canada: 800-263-8715.
